Ahmed Hassan Ahmed Ahmed Metered

Milan, Italy · ahmedmetered@icloud.com · linkedin.com/in/ahmedmetered · github.com/ahmedmetered · ahmedmetered.github.io

Product-minded builder. I take products from problem to paying users on my own: a monitoring SaaS with four self-serve pricing tiers, a CRM I sell as a managed service to training academies in Milan, and a travel commerce site — all live, all shipped end to end. Nearly three years of QA on an airline account taught me to measure, verify and root-cause before calling anything done.

EXPERIENCE

Quality Assurance Analyst, airline account 2022-2026
Sutherland Global Services, Cairo

- Advanced from reservations agent (Amadeus GDS) to virtual QA, then promoted to QA Lead: multi-channel quality checks, root-cause analysis, QA representation in the Cairo leadership team.

SELECTED WORK

SpecWatch (specwatch.me) live SaaS

- I picked the problem — suppliers change prices and specs without telling buyers — designed the four self-serve pricing tiers, built the product, and run its billing, alerts and daily digest: word-level diffs, headless-browser scan fallback, PDF reports, Stripe subscriptions. One Azure VM.

Posto (github.com/ahmedmetered/posto) open source

- A job-search app I designed, built and now use for my own search. It checks every posting against the person's real situation (work-permit hours, relocation and visa needs, remote eligibility, languages), says why each job is in or out, then tracks applications and reads the inbox for replies, and builds a one-page, ATS-friendly CV. 12 job sources, Chrome extension, 46 automated tests.

Coldbrew (github.com/ahmedmetered/coldbrew) open source

- Outreach app for local businesses that never sends anything itself. It finds and ranks the businesses in a city, enforces a short, honest message method with a linter, holds every draft for the user's approval, reads the replies and charts what works. Italian and English, can hand drafting to the AI agent you already use, 33 automated tests.

Cohorta (private) sold as managed service

- A CRM for cohort-based course academies that I sell and operate for training academies in Milan: enrolment pipelines, finance, client portals. My customer conversations shaped the roadmap; bilingual EN/IT with a CI gate on missing translations, 814 unit and 36 end-to-end tests.

Roam Alone (roamalone.app) live

- Paid day-by-day Egypt itineraries: request form, Stripe checkout, delivery with revisions. I run the whole loop myself — positioning, content, commerce, delivery.

Automation consulting, private clients London · Egypt

- Performance-based sales engine for a private clinic in London on GoHighLevel + Zapier: instant Sheets-to-CRM lead routing and automated database-reactivation campaigns. n8n automations for a healthcare business in Egypt. Sold, scoped, delivered, measured.

Open source (github.com/ahmedmetered)

- anyreconcile, anyjobsearch, anydeals, anyrea, anyaudit, anydiagram, cvhtml2doc, anyblueprint, i18n-keycheck, qa-automation-portfolio, perfume-finder, milanstudyspots, interrogami. Plus six bilingual Arabic-first demo sites.

SKILLS

Product & analytics: SQL · Excel / Google Sheets (advanced) · Python for data analysis · root-cause analysis · Ops & platforms: Stripe · SendGrid · n8n · Zapier · GoHighLevel · GitHub Actions CI · Linux (Caddy, pm2, Azure) · Docker · Salesforce · Engineering: Node.js · Next.js · React · TypeScript · PostgreSQL · SQLite · Playwright

EDUCATION

MSc Mechanical Engineering 2026-2028
Politecnico di Milano

BSc Automotive Mechatronics 2021-2025
Helwan University, Cairo (renamed Capital University)

- Thesis: fleet telemetry tracking over OBD-II and GPS, graded 91/110.
